

Japan-Vietnam Agricultural & Environmental Research Web Seminar

**★ Research Collaboration between Japan & Vietnam
- Past and Future -**

<Program Outline>

1. Opening

Opening: Purpose, Overview, Tutorial, etc.

Dr. Akinori Ozaki

Session Period

16:00-16:05

2. Introduction for our research activities in VN

2.1 Past Research Collaboration History

16:05-16:20

between Kyushu University and Vietnamese Universities

Dr. Kazuo Ogata

2.2 History of PhD studies achieved by Vietnamese scholars

16:20-16:35

in Kyushu University in the past two decades

Dr. Hideshi Yasui

2.3 Collaborative Researches on Integrated Watershed Management

16:35-16:50

in Vietnamese Watersheds

Dr. Toshinori Tabata

2.4 SATREPS cassava project in Vietnam, Cambodia and Thailand

16:50-17:05

Dr. Keiji Takasu

3. Introduction for research grant

17:05-17:15

4. Panel Discussion

17:15-17:50

=Topics=

- How can we generate the collaboration?
- What is a key factor for continuous collaboration?
- What can be a hot issue for future collaboration? , etc.

5. Closing

Consulate General of Vietnam in Fukuoka, Consul General

17:50-18:00

Mr. Vu Binh

<How to join the webinar?>

To attend a webinar, you need to register from QR code (see lefthand side!) or this URL => <https://forms.gle/5jCW9EkVxNrwSpVZ8>

Once you register, a registration confirmation email will be sent to your inbox with a unique link for you to join the webinar.

At the scheduled time of the webinar, click the link and join the webinar from your browser.

We welcome the participation of students and researchers who are interested in joint research and international cooperation between Japan and Vietnam.

<Brief Objectives>

This webinar will share the achievements how we have excavated and cultivated research collaboration with Vietnamese Universities and provide an opportunity to discuss about the future research collaboration between Japan and Vietnam.

< Guest Speaker >

Prof. Dr. Kazuo Ogata

Institute of Tropical Agri., Kyushu Univ.

Research Field: Entomology

Dr. Ogata has been working with VN through various kinds of projects since 1989. He may be a last active faculty member who knows the collaboration history with VN from the beginning to present.

Prof. Dr. Keiji Takasu

Faculty of Agriculture, Kyushu Univ.

Research Field: Insect Behavior

Dr. Takasu is a leader of JST-JICA SATREPS project related to Invasive Pest Management of Cassava. His experience as a leader of big project may give some hint for management of research collaboration with VN.

Prof. Dr. Hideshi Yasui

Faculty of Agriculture, Kyushu Univ.

Research Field: Plant Breeding

Dr. Yasui has a lot of experience of research collaboration with VN through rice breeding projects. Through the project he visited a various crop fields and this may give some unique idea for research collaboration with VN.

Assis. Prof. Dr. Toshinori Tabata

Faculty of Agriculture, Kyushu Univ.

Research Field: Hydraulics

Dr. Tabata has developed simulation models related to flood prevention and water resources management in Vietnamese watersheds. He is one of the young potential faculty members who can succeed the collaboration history with VN.

<Invited Panelist>

Prof. Dr. Pham Van Cuong

Vice President, Vietnam National University of Agriculture

Dr. Nguyen, Anh Vu

Plant Cell Biotechnology Agricultural Genetics Institute, Vietnam

Prof. Dr. Le Huy Ham

Chairman of Science Council,
Institute of Agricultural Genetics,
Vietnam

Assoc. Prof. Dr. Trieu Anh Ngoc

Faculty of Water Resources
Engineering
Thuyloi University, Vietnam
